

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claims

1. (Currently amended) A transducer holder comprising:
a base;
one or more fasteners for securing one or more transducers to the base, each fastener including first and second ends constructed and arranged to thread through an opening in a transducer assembly to secure a transducer; and
at least one strap for securing the base to the patient.
2. (Original) The transducer holder according to claim 1, wherein the one or more fasteners are a plurality of fasteners.
3. (Original) The transducer holder according to claim 2, wherein the plurality of fasteners include hook fasteners.
4. (Original) The transducer holder according to claim 1, wherein the one or more fasteners include hook fasteners.
5. (Canceled)
6. (Currently amended) The transducer holder according to claim ~~[[5]]~~ 1, wherein hook material on the first and second ends secure the transducer by attaching to the base.

7. (Currently amended) The transducer holder according to claim ~~[[5]]~~ 1, wherein hook material on the first ~~[[and]]~~ or second ~~end secures ends secure~~ the transducer by attaching to loop material on the ~~first end to the second~~ other end.

8. (Original) The transducer holder according to claim 6, wherein the one or more fasteners include a plurality of fasteners.

9. (Original) The transducer holder according to claim 7, wherein the one or more fasteners include a plurality of fasteners.

10. (Original) The transducer holder according to claim 1, wherein the at least one strap includes first and second straps adapted to secure the transducer holder to a patient's arm.

11. (Original) The transducer holder according to claim 10, wherein the first and second straps secure the transducer holder by the first and second straps wrapping around the patient's arm and the first strap attaching to the second strap.

12. (Original) The transducer holder according to claim 11, wherein the first strap includes a hook fastener for adhering to the second strap.

13. (Original) The transducer holder according to claim 10, wherein the one or more fasteners include hook fasteners.

14. (Canceled)

15. (Currently amended) The transducer holder according to claim [[14]] 13, wherein hook material on the first and second ends secure the transducer by attaching to the base.

16. (Currently amended) The transducer holder according to claim [[14]] 13, wherein hook material on the first [and] or second end secures ~~ends secure~~ the transducer by attaching ~~the first end to the second~~ to loop material on the other end.

17. (Original) The transducer holder according to claim 15, wherein the one or more fasteners include a plurality of fasteners.

18. (Original) The transducer holder according to claim 16, wherein the one or more fasteners include a plurality of fasteners.

19. (Currently amended) A transducer holder comprising:
a base;
one or more fasteners for securing one or more transducers to the base, each fastener including first and second ends constructed and arranged to thread through an opening in a transducer assembly to secure a transducer; and
means for securing the base to the patient.

20. (Original) The transducer holder of claim 19, wherein the one or more fasteners include hook fasteners.
